Lifelines are the systems and facilities that provide services vital to the function of an industrialized society and important to the emergency response and recovery after a natural disaster. These systems and facilities include communication, electric power, liquid fuel, natural gas, transportation, water, and wastewater. *(TCLEE 2009)*

San Francisco, CA 94102

AGENDA:

- 1. CALL TO ORDER AND AGENDA REVIEW (5 minutes)**
- 2. INTRODUCTIONS AND ROUND TABLE (30 minutes)**

Each attendee will share a basic fleet description for their organization and expected uses in post-disaster recovery and service restoration (if applicable).

5. DISCUSSION (35 minutes)

Lifelines Council members and attendees will share thoughts, experience, and case studies in order to collaborate on the following three questions:

- *How is your organization investing in present and future fuel/electric charging redundancy given the transition toward zero-emission vehicles?*
- *What should we (lifelines providers) be planning for when we build and upgrade vehicle yards to ensure our fleets can be powered after a disaster?*
 - *For example:*
 - *Battery storage capacity*
 - *Onsite solar generation*
 - *More charging stations*
 - *Alternate fuel sources*
- *What information or data is needed to support your organization's planning for redundancy to power its fleet?*
